DETAILED ACTION

Response to Amendment

1. The amendment filed on 8/30/04 has been entered and made of record. Claims 9, 13-17, 21, and 25-42 are pending.

Response to Arguments

2. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Allowable Subject Matter

3. Claims 9, 13-17, 21, and 25-42 are allowed.
4. The following is an examiner's statement of reasons for allowance:

Regarding independent claim 9, the claim recites: a controller which couples said image capture and said printer interface, said controller having a first network interface which connects to an area network for bidirectional exchange of digital data; and a second network interface which connects to a second network for bidirectional exchange of digital data; a control program stored accessibly to and executable on said controller, said control program when executing enabling a user to select delivery of the digital record to a selected one of said printer interface, said first network, and said second network interface; and a memory coupled to and housed with said controller; said control program when executing on said controller further enabling a user to store a database of address information in said memory and to selectively access one of said database of

address information stored in said memory and a second database of address information stored remotely from said controller and accessible through said first network interface.

The prior art of record, Kobayashi does not contain a specific first network interface and a second network interface connected directly to the multifunction device (MFD) 3, and does not contain a memory within the MFD that contains one of said database of address information.

The features identified, in combination with other claim limitations, are neither suggested nor discussed by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
